## ELECTION/RESTRICTIONS

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 23-31 drawn to methods for manufacturing a microlens array and providing a display screen formed as a microlens array, classified in class 359, subclass 626.
- II. Claims 16-22 drawn to a display screen classified in class 359 subclass 454.

The inventions are distinct, each from the other because of the following reasons. Inventions II and I are related as methods of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the methods as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different method (MPEP § 806.05(f)). In the instant case product as claimed can be made using a wide variety of known processes for making microlens arrays.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Gregory J. Michelson on May 11, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
